## Full-time team

With a dedicated full-time team that has decades of technical experience, delivered via our strategically located offices in order to accelerate mobilisation, we know we can deliver the right people where they are needed, when they are needed.

## CEO Message

*"I believe a team is only as good as the people in it from those in the front line to those in the back office. With that in mind I will always strive to provide the best work place, best conditions and the utmost respect for all, at all times, without exception. As I do this, all the teams I work with will deliver services to the standard that you would expect from the best and therefore protect and allow your assets to thrive."*

Don Buddhika

- Health and Safety Policy
- Workplace Violence Policy

### Safety and Training

At HEIGHTSWORK (Pvt) Ltd, safety is our number one policy. There are many dangers associated with our line of work which is why we enforce all occupational health and safety (OHSA) and IRATA Standards regulations. Our staff have been trained to make the job as safe as possible. We're proud of our flawless safety record, which we achieve through strict adherence to the following:

## ROPE ACCESS PERSONNELS

*HEIGHTSWORK (PVT) LTD carries out a broad range of inspection, repair and maintenance services in conjunction with specialist access skills and capabilities. One of the key access methods used by the Company is rope access. This procedure, supported by other documents, legislation, guidelines and codes of practice, referenced within the main text, forms part of Company's Safety Management System and provides technical guidance on safe working practices in the workplace.*

*All personnel participating in or using Rope Access Activities are required to comply fully with HEIGHTSWORK procedures. A copy of HEIGHTSWORK procedures is supplied to Supervisors in the site job pack. This can be referenced by company employees at any time. HEIGHTSWORK personnel are reminded that they are the only persons qualified to assess conditions and advise the client*

*Rope Access operations can only be carried out in a reliable safe manner where technicians are competent, suitably experienced and trained and subject to appropriate levels of supervision. This includes the capability to inspect and maintain their own equipment before each use; pre-use checking is a fundamental requirement of HEIGHTSWORK safety procedures.*

*All personnel have a responsibility to report incidents, accidents, unsafe conditions and unsafe acts to the Supervisor or the worksite Safety Officer.*

## SERVICES WE OFFER

Rope Access NDT Inspections

## PRIME LINE OF BUSINESS

### ROPE ACCESS

Of the buildings we maintain, more and more are only permitted rope access because its proven to be safer, more cost effective and allows for more technical, advanced manoeuvres without the negative effects on the body or the surrounding environment.

### WINDOW CLEANING

Enhance the image your property presents to the world with properly cleaned windows. Overhangs, balconies, all-glass facades and more, our experienced team can manage the unique challenges of any property. We'll get the job done safely and get it done right. We are best removing hard stain (water drips marks) on glasses.

We offered enviornements friendly methods for all types of cleaning. Minimum water use & biodegradable chemicals for your property.

### UT GAUGING OF PIPING SYSTEM AND PRESSURE VESSELS

HEIGHTSWORK' experienced inspectors can provide any depth of UT survey required on piping and pressure vessels. From full baseline surveys of all piping on-board to specific requirements.
